ResQ Invited to Participate in the Banff Venture Forum

September 15, 2009

[Toronto] – ResQ Mobile Services, one of the top mobile services technology firms in Canada, has been selected to present its growth strategy at the Banff Venture Forum, Western Canada's premiere investment symposium. The invitation to this prestigious event comes on the heels of ResQ's win at the 2009 Manitoba Venture Challenge, where they outpaced dozens of other aspiring Manitoba companies in a program aimed at grooming businesses for next-level capital acquisition.

The Banff Venture Forum is an annual symposium that attracts capital and related investment organizations and experts from across North America. This year's forum takes place October 1st and 2nd in Banff, and provides opportunities for the investment experts to meet some of Canada's best investment prospects in the technology sector. The Forum is designed to showcase the hottest hi-tech companies, offer insight into key issues within the industry, provide a premium networking opportunity and give companies a chance to learn from world-class professionals in the investment community. ResQ was selected, along with a dozen other high-tech firms, to make a presentation to the investors based on its aggressive growth strategies and strong strategic vision.

"We are excited about having the opportunity to tell the ResQ story to a room full of prominent industry investors. I am sure once they hear our vision and see where we've come from that they will be as excited as we are about ResQ's growth and future in this emerging marketplace," remarked Chad Hughes, President and CEO of ResQ Mobile Services "Our invitation to present at the forum represents a solid endorsement of our business strategies and vision for growth."

A selection committee consisting of a variety of investors from across Canada chose presenters based on a standard application process. Apart from specific investment strategies, all applicants were weighed against specific criteria including the uniqueness of their technology application, past and projected revenues, strength of their management team, and various market factors.
